

## BADGER LAKE TRAIL

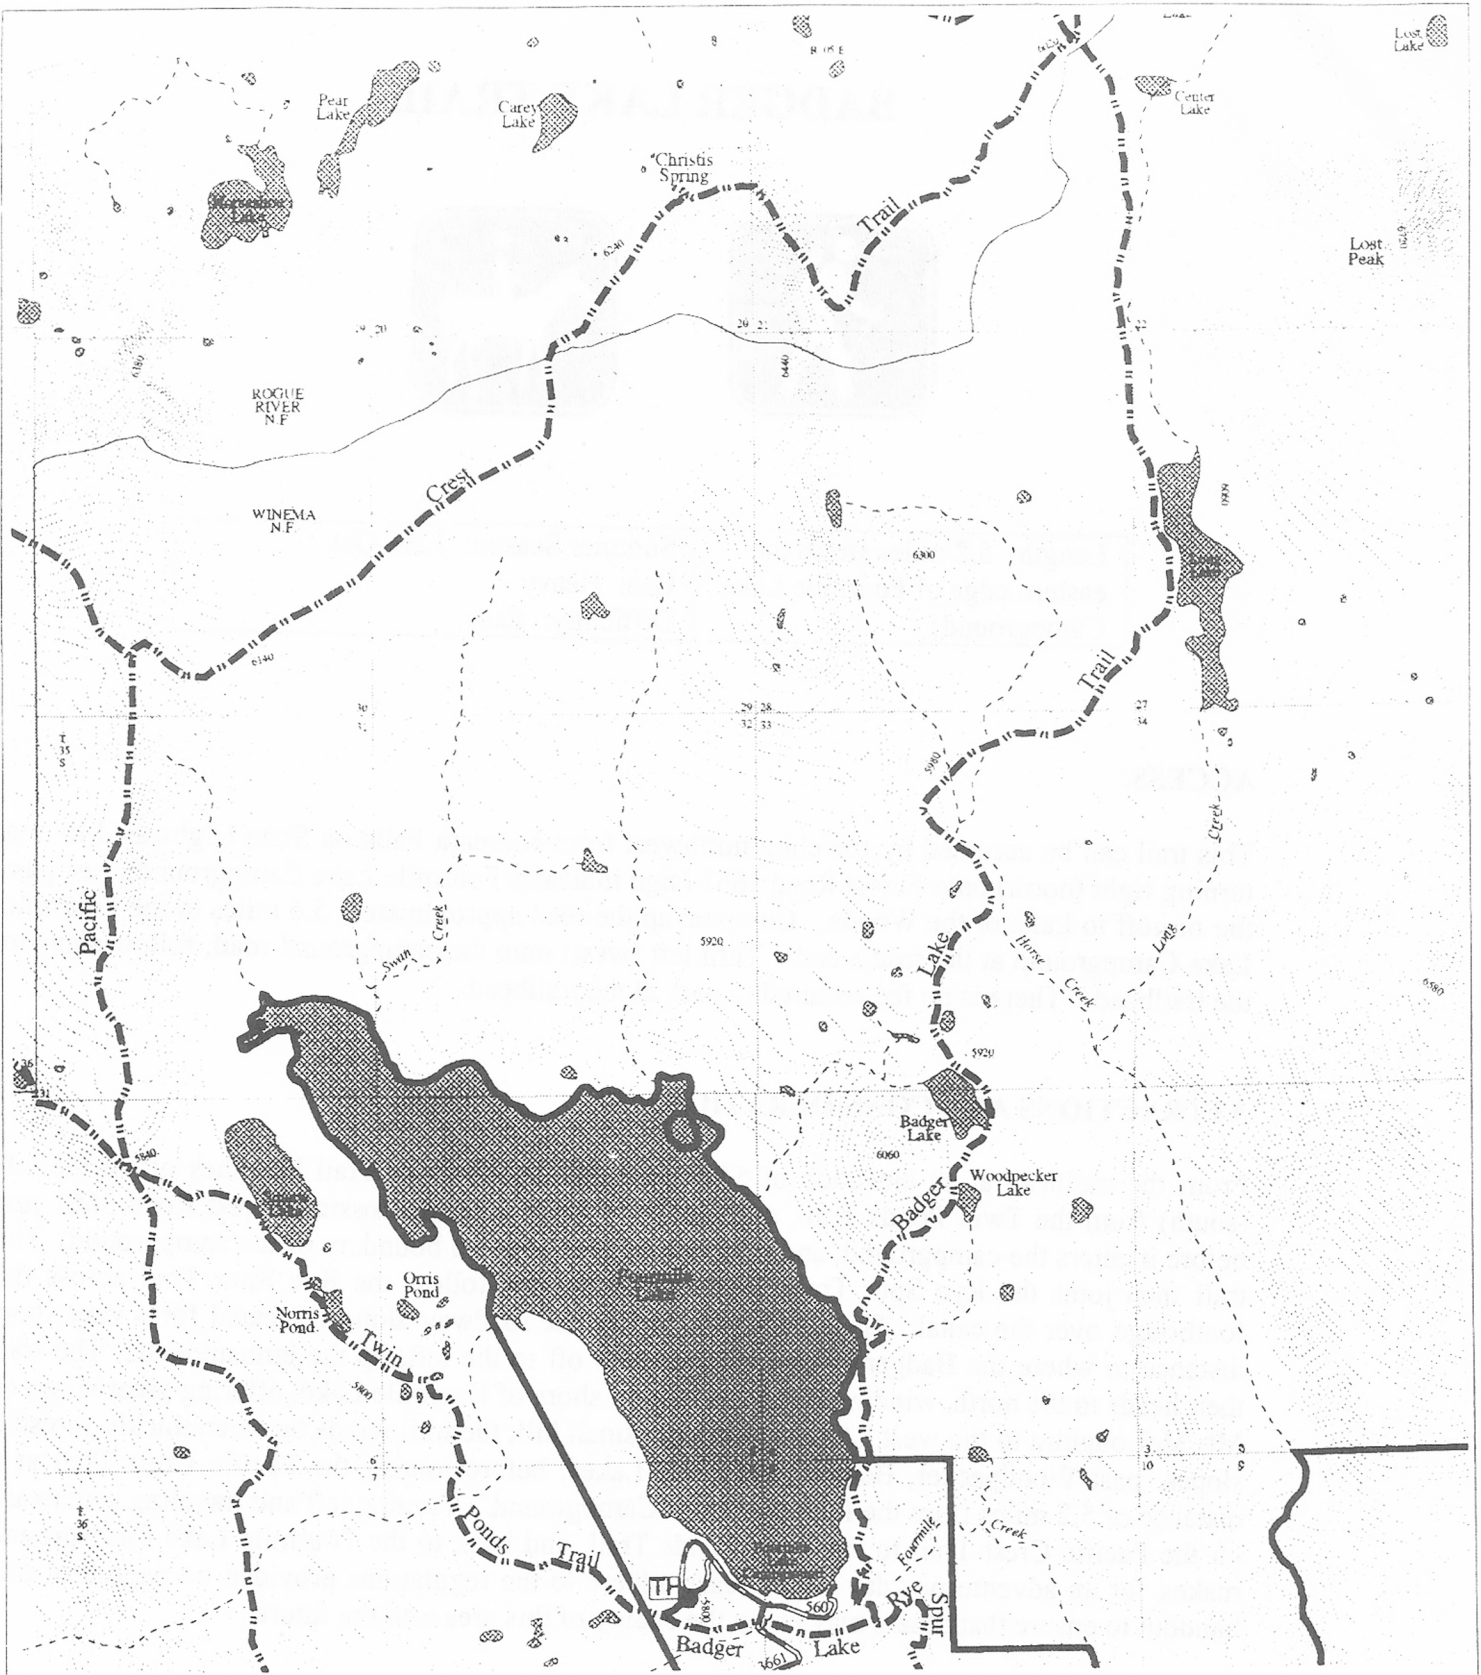

Length: 5.2 miles (from the eastern edge of Fourmile Lake Campground)	Summer Season: June-Oct. Use: Heavy Difficulty: Easy
---	--

### ACCESS:

This trail can be accessed by traveling northwest from Klamath Falls on State Highway 140 and turning right (north) onto Forest Road 3661 (sign indicates Fourmile Lake Campground), just past the turnoff to Lake of the Woods. Continue up the road approximately 5.6 miles to the Fourmile Lake Campground at the road's end. Turn left (west) onto the campground road; follow signs to the trailhead. There is no fee required to park at the trailhead.

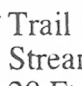

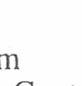

### ATTRACTIONS AND CONSIDERATIONS:

From the trailhead at an elevation of 5700 feet, the Badger Lake Trail branches off to the left (south) from the Twin Ponds Trail, and circles to the southeast, crossing Forest Road 3661 just before it enters the campground, and parallels the southeastern boundary of the campground. The trail then joins the Rye Spur Trail; turn left (north) and follow the Rye Spur Trail across the footbridge over the canal. Then turn right, follow the roadway along the canal for a very short distance to where the Badger Lake Trail branches off to the left, up the embankment. The trail then heads to the north, winding along the eastern shore of Fourmile Lake, offering great views of Mt. McLoughlin to the west. After climbing a small hill, the trail winds between thickly forested slopes, past Woodpecker, Badger, and Long Lakes, before joining the Pacific Crest Trail at a distance of 5.2 miles from the Fourmile Lake Campground. Turning left and traveling southward on the Pacific Crest Trail to the Twin Ponds Trail, and back to the Fourmile Lake Campground makes for an adventurous day trip. Please adhere to the regulations provided on page 3 of this handout to ensure that others may enjoy the beauty of this area into the future.
